

DIRECTA ceramir®

"Ceramir Protect LC is my preferred material for indirect pulp capping due to its superior handling compared to calcium hydroxide and similar products."

Neville Hatfield, DMD

Seal, Cement, and Protect with the Best – Ceramir Crown & Bridge + Protect LC

- Using Ceramir Crown & Bridge together with Ceramir Protect LC provides a bioactive, patient friendly solution for long-term restorative success. This powerful combination enhances marginal sealing, protects dentin, and simplifies procedures by eliminating the need for separate adhesives or liners. Both products promote natural remineralization, reduce sensitivity, and create an ideal environment for tissue healing - making them a smart choice for modern restorative dentistry.

3+1

Buy 3 of the same Ceramir Crown & Bridge Cement or Protect LC (same pack size), and get 1 FREE of equal or lesser value.
