NEW! RE-GEN® Bioactive Cement

RE-GEN™ Bioactive Cement is a dual-cure self-adhesive resin cement with built-in bioactivity designed for indirect restorations that deliver strong, reliable bonding while actively supporting remineralization at restoration margins.

- **Bioactive Protection with Bioglass** – Supports remineralization and helps protect margins for long-term restoration integrity
- **Strong, Reliable Bond Strength** – Delivers durable adhesion across multiple substrates for long-term clinical confidence
- **Long-Term Durability** – Designed to maintain marginal integrity and resist degradation over time
